Internship Certificate

This to certify that **Mr. Bishesh Maharjan** has successfully completed his internship as a **Quality Assurance** at **Aquiden Software Pvt.Ltd** from **2nd April 2025** to **2nd July 2025.**

During the internship period, he demonstrated a solid understanding of software testing methodologies, including manual testing, test case design, and defect reporting. He actively participated in functional testing, regression testing, and collaborated with development teams to ensure product quality and performance.

Bishesh Maharjan exhibited excellent attention to detail, effective communication skills, and a strong eagerness to learn. He quickly adapted to QA tools and processes in a real-world software development environment.

We appreciate his valuable contributions and wish him continued success in his future professional endeavors.

Regards,

.....

Ankit Poudel

Supervisor's Recommendation

The internship report entitled 'Quality Assurance Internship' submitted by Bishesh Maharjan (26485/077), of Academia International College, is prepared under my supervision as per the procedure and format requirements laid by the Faculty of B.Sc. CSIT, Tribhuvan University, as partial fulfillment of the requirements for Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT). We, therefore, recommend the internship report for evaluation.

.....
Anand Adhikari
Supervisor
Department of Computer Science and Information Technology
Academia International College
Gwarko, Lalitpur

Tribhuvan University

Department of Computer Science and Information Technology

Academia International College

Letter of Approval

This is to certify that this report prepared by Bishesh Maharjan entitled “Quality Assurance Internship” in partial fulfilment of the requirement for the degree of B.Sc. in Computer Science and Information Technology has been well studied. In our opinion it is satisfactory in scope and quality for the required degree.

…….. Mr. Anand Adhikari Supervisor Department of Computer Science and IT Academia International College	…….. Mr. Bishwas Mathema HOD/Program Coordinator Department of Computer Science and IT Academia International College
…….. Internal Examiner Academia International College	…….. External Examiner Central Department of CSIT Tribhuvan University

ACKNOWLEDGEMENT

The successful completion of this internship report would not have been possible without the support and assistance of many individuals and organizations. I feel immensely blessed to have gotten this during the course of my internship program. I would like to take this opportunity to offer my earnest admiration to each and every one of them.

I express my sentiment of gratitude to Mr. Ankit Poudel sir, who has been a continuous source of inspiration as my intern mentor. Without his constant guidance and suggestions, this report would have been nowhere near completion. My gratitude for his trust and generosity goes beyond words. I am thankful to my learned and revered supervisor for his upbeat personality, kindness; encouraging support, and willingness to help have tangibly and greatly improved the quality of my Internship Report and brought it up to its present status. I owe my deepest gratitude to the authors whose work I have used in this report as I had to depend on different national and international publications for the completion of the internship report.

I am especially grateful to my supervisor, Mr. Anand Adhikari(Supervisor) who has also been a positive and encouraging influence on my efforts. Finally, I thank to all our teachers and colleagues who prepared me for this endeavor.

Sincerely,
Bishesh Maharjan,
TU Exam Roll No: 26485/077

ABSTRACT

This report presents an in-depth account of the author's internship experience as a Quality Assurance (QA) intern at Aquiden software Pvt. Ltd. The author's primary responsibility was to ensure the quality and reliability of the company's software products through rigorous testing and bug identification. The author was actively involved in various phases of QA testing, including test planning, execution, and documentation. This report highlights my role in testing different modules and functionalities, identifying and reporting bugs, and collaborating with developers to resolve these issues.

During the internship, the author faced several challenges, which the author tackled using effective problem-solving strategies and industry best practices. The author has gained hands-on experience with QA methodologies and testing techniques, enhancing the understanding of software quality assurance. Additionally, working in a team-oriented environment and communicating with clients to address system issues were key components of author role, contributing to the overall enhancement of software quality.

This internship has been instrumental in bridging the gap between theoretical knowledge and practical application, allowing the author to develop the author's skills in ensuring software quality and reliability. The experience has provided valuable insights into QA testing processes and the importance of meticulous attention to detail in delivering high-quality software products.

Keywords: ***Quality Assurance, QA Testing, Bug Tracking, Test Documentation, Software Quality, Client Communication***

CHAPTER 1: INTRODUCTION

1.1 Introduction:

This report documents the internship experience as a Quality Assurance (QA) intern at Aquiden software Pvt. Ltd. The internship was a predetermined agreement between the author and Aquiden software Pvt. Ltd., spanning a period of three months, from April 2 to July 2 of the subsequent year.

During this internship, the author's primary role was to ensure the quality and reliability of Aquiden software Pvt. Ltd.'s software products and services. The author's main objective was to enhance their IT platform by identifying and rectifying potential issues or bugs, thereby optimizing user experience.

Throughout the internship, the author actively participated in testing various software applications and platforms offered by the company. The author's focus was on identifying bugs, errors, and inconsistencies, as well as documenting these findings to assist users in understanding the system's functionality. The author collaborated closely with the development team, providing feedback and suggestions to improve the overall quality and functionality of the products.

Aquiden software Pvt. Ltd. is dedicated to delivering high-quality software for clients. Author's responsibilities as a QA intern were aligned with the organization's mission to ensure customer satisfaction through exceptional software services.

To effectively fulfill my responsibilities, the author utilized various QA tools and methodologies, including manual testing and API testing. The author gained proficiency in writing test cases, executing test plans, and documenting test results to facilitate efficient communication and collaboration within the development team.

In conclusion, this internship at Aquiden software Pvt. Ltd. provided the author with valuable insights into the significance of quality assurance in software development. This experience equipped me with practical skills that will undoubtedly benefit the author's future career in the IT industry.

1.2 Problem Statement:

Despite the increasing demand for high-quality software products and services in the market, Aquiden software Pvt. Ltd. faces challenges in ensuring the reliability and user satisfaction of its IT training platform and other software offerings. As a Quality Assurance (QA) intern, author's primary objective is to identify and rectify potential issues, bugs, and inconsistencies within the software products to enhance user experience.

However, the current QA processes at Aquiden software Pvt. Ltd. may lack efficiency and thoroughness, leading to overlooked defects and suboptimal product quality. This shortfall presents a significant obstacle to the company's mission of delivering top-notch services to clients, such as hotels and supermarkets. Therefore, the core issue revolves around improving the effectiveness and efficiency of the QA procedures. Addressing this issue is crucial to aligning with the organization's commitment to delivering high-quality software solutions and ensuring customer satisfaction.

1.3 Objectives:

- To systematically evaluate the software products and services offered by Aquiden software Pvt. Ltd., with a focus on identifying and documenting potential issues, bugs, and inconsistencies to ensure optimal functionality and reliability.
- To collaborate closely with the development team to provide timely feedback and suggestions for improving the overall quality and functionality of the software products, thereby enhancing user experience and customer satisfaction.
- To implement and utilize various QA tools and methodologies, including manual testing, UI testing, and API testing, to streamline the QA process and ensure thorough and efficient testing of software applications and platforms offered by Aquiden software Pvt. Ltd.

1.4 Scope and Limitation:

1.4.1 Scope

- To conduct thorough manual testing to detect and report bugs, errors, and inconsistencies.
- To assist in developing and updating documentation for test procedures, test cases, and test results. To use bug tracking systems to monitor and report issues, communicate with developers, and verify fixes.
- To gather feedback, understand requirements, and address concerns to ensure software quality and a positive user experience.

1.4.2 Limitations:

- Internships typically have a fixed duration, limiting the time available for thorough testing. Prioritizing tasks may prevent the exploration of all scenarios or edge cases.
- Manual testing may miss certain bugs due to human limitations and biases, potentially affecting software quality.
- Repetitive tasks in manual testing can be monotonous and tedious, leading to decreased productivity and motivation.
- API testing can be complex and challenging due to integration issues with other systems, making comprehensive testing difficult.
- UI testing is hindered by frequently changing interfaces, leading to maintenance challenges for test scripts and potential missed issues.

1.5. Report Organization

The report is organized into the following chapters:

Chapter 1: Introduction

This chapter introduces and discusses the main points related to the internship and project. It covers the following aspects: Introduction and aspects of Internship and Project, Objectives, Problem Statement, Scope of Project, and Limitations of the Project.

Chapter 2: Organizational Details and Overview

This chapter provides an overview of the organization, including its hierarchy and working domains. It describes the intern department and reviews relevant literature related to the project objectives.

Chapter 3: Internship Activities

This chapter outlines my roles and responsibilities during the internship. It includes a description of the project I was involved in, along with details of all tasks and activities undertaken during my internship.

Chapter 4: Conclusion and Learning Outcomes

This chapter concludes the report and summarizes the project and internship experience. It also discusses the learning outcomes achieved during the internship.

CHAPTER 2: ORGANIZATION DETAILS AND LITERATURE REVIEW

2.1. Introduction to Organization:

Aquiden softwarenology is a dynamic startup company specializing in delivering customized software projects by matching clients with top-tier developers. It was established in 2023 with a vision to revolutionize the tech industry, Aquiden softwarenology operates on a unique model where they not only connect clients with software experts but also ensure seamless project execution and client satisfaction. The company prides itself on its ability to understand the specific needs of each client, offering tailor-made solutions that align perfectly with their business goals. With a dedicated team of professionals and a commitment to innovation, Aquiden softwarenology is poised to make a significant impact in the software development sector. Their mission is to simplify the process of software project delivery, making it efficient, cost-effective, and transparent for every client they serve.

2.2 Organizational Hierarchy:

The organizational hierarchy of Aquiden software is as follows:

CTO: Sisir Pokharel

MD: Rajendra Rijal

Total number of team members: 6-10

The following figure shows the entire organizational hierarchy of Aquiden software Pvt. Ltd. :

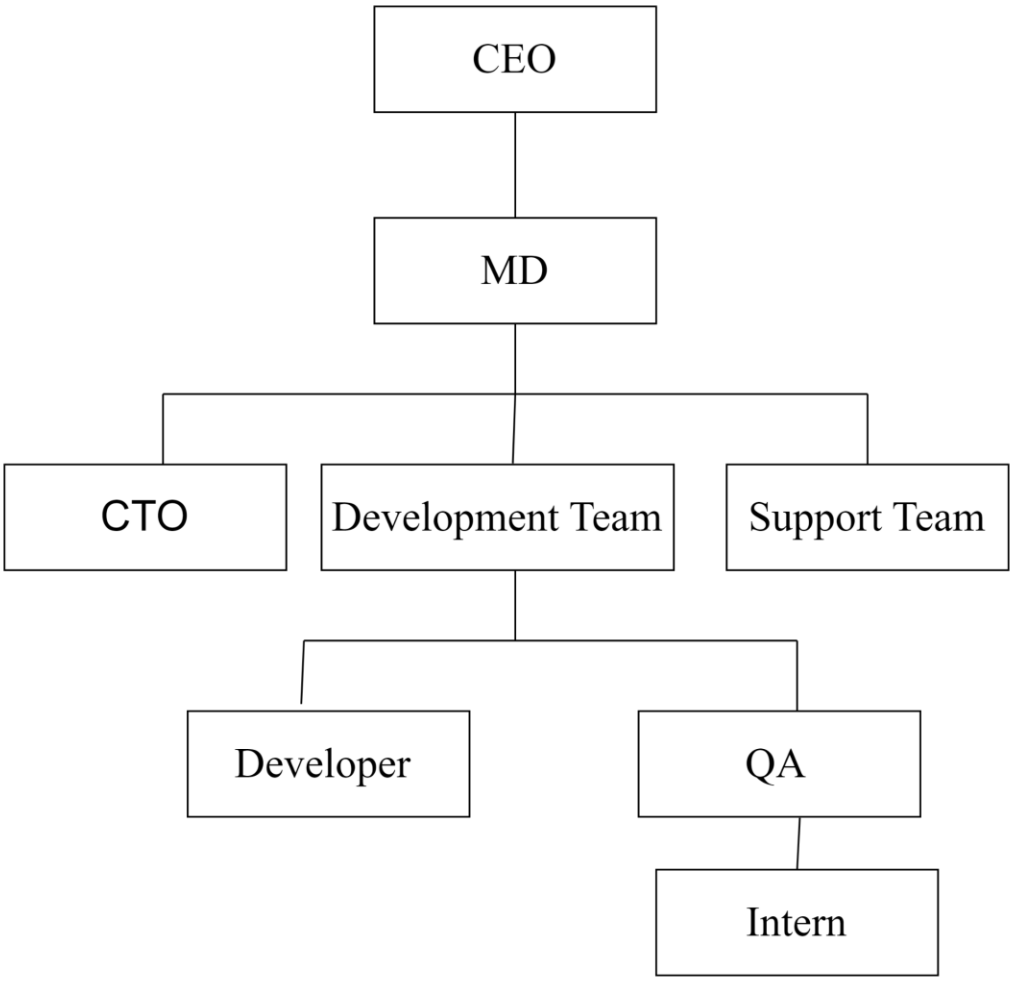

Figure: 2.2 Organization Hierarchy

2.3 Working Domains of Organization:

Aquiden software Pvt. Ltd. operates as a versatile provider of software solutions, engaging with outsourcing clients and managing internal projects across diverse industry sectors. With a strong focus on innovation and client satisfaction, Aquiden software offers tailored services designed to meet specific business requirements.

Web Application Development

Aquiden software Pvt. Ltd. excels in crafting robust web applications tailored to client specifications. These applications are designed to operate seamlessly on web browsers, offering

scalable solutions that cater to various business needs. By leveraging cutting-edge technologies and adhering to best practices, Aquiden software ensures the delivery of efficient, secure, and user-friendly web applications.

Android Application Development

Specializing in Android app development, Aquiden software Pvt. Ltd. creates dynamic mobile applications for the Android platform. These apps are meticulously crafted to enhance user engagement and functionality, leveraging the latest Android SDK and development tools. Aquiden software prioritizes user experience, performance optimization, and compatibility across a wide range of Android devices to deliver compelling mobile solutions.

iOS Application Development:

Aquiden software Pvt. Ltd. delivers high-quality iOS applications tailored for Apple devices, ensuring a seamless user experience on iPhones, iPads, and other iOS-powered gadgets. With a focus on intuitive design, performance optimization, and adherence to Apple's stringent guidelines, Aquiden software develops apps that meet the unique demands of iOS users. Their expertise spans from initial concept to app store deployment and ensuring comprehensive support throughout the development lifecycle of the application.

Blockchain Development:

Aquiden software Pvt. Ltd. offers specialized development services for creating decentralized applications (dApps) and blockchain solutions. They harness the power of blockchain to enhance transparency, security, and efficiency across various industries. Aquiden software's blockchain development team excels in smart contract development, cryptocurrency integration, and custom blockchain solutions, empowering clients to innovate and transform their business processes securely and reliably.

2.4 Description of Intern Department:

Aquiden software maintains a dynamic intern department where interns are paired with mentors specializing in front-end development, back-end development, or quality assurance (QA). The program begins with interns independently exploring foundational technologies for document processing using online resources. Mentors then guide them through deeper dives into specific technologies, assigning tasks and minor projects tailored to individual learning curves and company needs. At the end of each day, interns report their progress to mentors, receiving valuable feedback to refine their skills. This structured approach not only fosters hands-on experience but also cultivates professional growth in frontend, backend, and software testing, preparing interns for future roles in software development and quality assurance within the company.

2.5 Literature Review:

In the realm of quality assurance (QA), manual testing remains indispensable as it ensures the reliability, usability, and overall user experience of software products. This review explores key concepts, methodologies, challenges, and best practices associated with manual test quality assurance, alongside considerations for API and UI testing.

Importance of Manual Testing:

Manual testing plays a crucial role in validating software functionality and detecting defects that could impact user experience and system performance. Unlike automated testing tools, manual testing offers a human perspective, enabling testers to assess real-world usability and compatibility across diverse platforms. Smith, J. (2021)

Methodologies and Techniques:

Various methodologies and techniques enhance the effectiveness of manual testing processes. Exploratory testing encourages testers to rely on creativity and intuition to uncover unforeseen issues during real-time software exploration. Jones, C., Smith, D., & Thomas, E. (2020) Techniques such as boundary testing, equivalence partitioning, and error guessing are commonly

employed to identify boundary conditions, equivalence classes, and potential defects in software systems.

Best Practices and Strategies

Organizations adopt several best practices to optimize manual testing and mitigate its inherent challenges. Effective test planning, prioritization of test cases based on criticality, and robust defect-tracking mechanisms are integral to successful manual testing initiatives. Brown, A., & Lee, B. (2019).

API and UI Testing Considerations

In addition to manual testing, API and UI testing are critical components of comprehensive quality assurance. API testing verifies the functionality, reliability, performance, and security of APIs, ensuring seamless integration and interaction between software components. White, S., & Green, K. (2022). UI testing focuses on validating user interfaces for visual consistency, responsiveness across different devices, and adherence to design specifications, thus enhancing the overall user experience. Taylor, M., Johnson, P., & Clark, R. (2023)

CHAPTER 3: INTERNSHIP ACTIVITIES

3.1 Roles and Responsibilities:

Working as a Quality Assurance (QA) Analyst involves ensuring the quality and reliability of software products by conducting thorough testing and documentation processes. As a QA Fresher, the author was entrusted with the following responsibilities:

- Test Execution: Conduct comprehensive testing of every functionality or module within the software product to identify defects, inconsistencies, and areas for improvement. Execute test cases meticulously to validate software functionality and ensure adherence to requirements and specifications.

- Documentation: Create detailed documentation of test plans, test cases, and test results to provide clear guidelines for testing activities and facilitate future reference. Maintain accurate records of defects, including descriptions, reproduction steps, severity levels, and resolutions.

- Client Communication: Engage in effective communication with clients to understand and address any issues or concerns related to the software product. Act as a liaison between clients and the development team, conveying client feedback, reporting defects, and providing status updates on issue resolution.

- Defect Management: Identify and report errors or bugs discovered during testing using defect tracking tools. Assign reported issues to the appropriate developers for further investigation, analysis, and resolution.

3.1.1 Duration of Internship:

As per the requirements of Tribhuvan University, the internship was done for 3 months (April 2, 2025 – July 2, 2025).

Internship Duration

Table 3.1 Internship Duration

Office hour	10:00 am- 6:00 pm
Working hour	8 hours a day
Working days	5 days a week
Average Working Hours	40 hours a week
Internship Period	3 months
Holiday	Saturday, Sunday
Internship Position	Quality Assurance Intern

3.2 Weekly log:

Table 3.2 Weekly Log

Week	Activities Performed
1	Onboarded to the billing management software, studying its architecture and functionalities. Initiated basic manual testing to understand system behavior.
2	Conducted manual UI testing, focusing on usability. Documented test cases and results for future reference.
3	Learned API testing concepts and tools. Executed initial API tests to validate data integrity and module interactions

4	Collaborated with developers on bug-fixing processes. Reported and tracked issues using JIRA, ensuring timely resolutions.
5	Expanded UI testing to cover edge cases and diverse user scenarios. Applied exploratory testing to uncover potential issues
6	Participated in test plan discussions for software updates. Contributed to formulating regression and new feature-testing strategies
7	Performed performance testing to evaluate system response times and resource utilization under various loads. Documented performance metrics
8	Assisted in security testing, verifying user permissions and data encryption practices.
9	Conducted user acceptance testing (UAT) with client representatives, ensuring software meets requirements and expectations.
10	Compiled and presented test reports summarizing activities, outcomes, and improvement recommendations.
11	Explored automation frameworks like Selenium and Postman. Developed basic automation scripts for regression testing.
12	Completed the internship with a comprehensive review of testing methodologies. Prepared final report outlining achievements, challenges, and recommendations.

3.3 Description of the project involved during the internship:

During the internship, the primary project undertaken by the author was an Invoice and Billing Management System built using the Fast API framework and PostgreSQL as the database. This system streamlines the process of creating, sending, and managing invoices and bills for businesses, ensuring efficiency and accuracy in financial operations. It automates tasks such as generating invoices, sending reminders, and maintaining comprehensive billing records, ultimately enhancing the financial workflow and reducing manual errors.

Backend: The backend of the system leverages the Fast API framework, known for its high performance and ease of use. Fast API allows for the creation of robust APIs that are both easy to implement and maintain. The backend handles all business logic, including invoice generation, data validation, and interaction with the PostgreSQL database. PostgreSQL is chosen for its reliability, scalability, and powerful querying capabilities, ensuring that the system can handle large volumes of transactional data securely and efficiently.

Frontend: The front end of the Invoice and Billing Management System is designed to be user-friendly and intuitive. It provides a seamless interface for users to create, view, and manage their invoices and billing records. The front end is built using modern web technologies HTML, CSS, and JavaScript, possibly leveraging frameworks React to ensure a dynamic and responsive user experience. This ensures that users can interact with the system smoothly, with real-time updates and a streamlined workflow.

3.4 Activities Performed :

3.4.1 Study of Legacy Documentation:

A thorough examination of previous documentation pertaining to various modules was conducted. This involved reviewing specifications, requirements, and architectural details to gain a comprehensive understanding of each module's functionality.

3.4.2 Testing of Modules Across Hospitality:

Extensive manual, API, and UI testing was performed on diverse modules deployed in the hospitality sector. Test cases, scenarios, and scripts were meticulously executed to validate module functionality, performance, and reliability.

3.4.2.1 BROWSER TESTING AND IT'S TEST CASES:

Table 3.4.2.1 Browser testing test case

To test	Mode	Device	Browser	ver	Resolution	Behavior/ Register	Behaviour /terms	Behaviour/us
Yes	Desktop	HP Windows	Chrome	117	3840*2160	Ok	Ok	Ok

Yes	Desktop	HP Windows	Chrome	117	1440*900	Ok	Ok	Ok
Yes	Desktop	HP Windows	Firefox	119	3840*2160	Bottom font is too thin	Different placement on the pop-up	Different placement on pop-up
Yes	Desktop	HP Windows	Firefox	119	1440*900	Bottom font too thin	Different placement on pop-up	Different placement on pop-up

3.4.2.2 UI TESTING AND ITS TEST CASES:

Table 3.4.2.2 UI testing and its test cases

To test	Ticket Number	Expected Behaviour	Result	Pass/fail
Whether the print button functions properly or not?	1290	Works properly	Works properly	Pass
Shortcut key for print button works or not?	1291	Works Properly	Works properly	Pass
Does print window popup works properly or not?	1292	Pops up faster	Lagging in opening the pop up window	Fail
Does Bill contain all the required data?	1293	Should contain all the expected data	Some contents are missing	Fail
Does the bill print correctly on selected printer?	1310	Bill should print on selected printer	Bill prints correctly	Pass
Does the cancel print button work?	1315	Cancel button should stop the printing process	Cancel button works	Pass

Can the print settings be customized?	1316	Print settings should be customizable	Customization works	Pass
Is the bill alignment correct?	1320	Bill alignment should be centered and neat	Alignment is off-center	Fail

3.4.3 Documentation Creation

Detailed documentation was meticulously prepared for each tested module. These documents comprehensively outlined testing methodologies employed, test results, observations, and identified defects or issues. Clear documentation facilitated effective communication and served as a valuable reference for future initiatives.

3.4.4. Issue Identification and Bug Reporting:

Any issues, bugs, or errors identified during testing were promptly documented and reported using Jira. These issues were systematically tracked and assigned to developers for investigation and resolution, ensuring timely rectification of defects.

3.4.5. Collaboration with Developers:

Close collaboration with development teams was maintained throughout the internship. This collaboration involved ongoing communication and coordination to address and resolve identified issues, bugs, and defects efficiently.

3.4.6. Client Communication:

Proactive communication with clients was prioritized to address any issues or concerns discovered within their systems. Timely and transparent communication helped to mitigate client concerns, build trust, and ensure client satisfaction with the resolution process.

CHAPTER 4: CONCLUSION AND LEARNING OUTCOMES

4.1 Conclusion:

In conclusion, the Quality Assurance (QA) internship provided invaluable insights and practical experience in the dynamic field of software testing. Throughout the internship, the author engaged in thorough testing processes, meticulously examining various modules to ensure their functionality, reliability, and security.

By studying old documents, testing different modules across multiple hotels, and creating comprehensive documentation for each tested module, the author honed skills in test planning, execution, and documentation. Additionally, raising and tracking issues, bugs, and errors, and collaborating closely with developers enabled me to understand the importance of effective communication and teamwork in resolving software defects.

Moreover, proactive communication with clients to address issues in their systems underscored the significance of client satisfaction and relationship management in the QA process. Overall, the internship provided a valuable opportunity to apply theoretical knowledge to real-world scenarios, preparing the author for a successful career in quality assurance.

4.2. Learning Outcome:

The author's journey into the professional world began with a transformative three-month internship at Aquiden software Pvt. Ltd. Despite being new to real-world work, my time at Aquiden software Pvt. Ltd. proved immensely enriching. Working alongside a team of enthusiastic and experienced professionals, the author cultivated a range of skills essential for career growth.

During the author's twelve-week tenure, the author honed skills as a Manual, API, and UI gaining proficiency in test case creation, execution, and defect tracking. This hands-on experience deepened the author's understanding of QA processes, including test planning, documentation, and collaboration with development teams. Effective communication with developers and clients sharpened the author's interpersonal skills and taught the author to articulate technical concepts clearly.

Moreover, the internship enhanced the author's problem-solving abilities through the identification and resolution of issues during testing sessions. Engaging with clients underscored the importance of a client-centric approach and taught the author to prioritize client satisfaction.

Overall, the QA internship equipped the author with valuable skills, knowledge of industry-standard QA methodologies, and a mindset of adaptability and continuous improvement. It was a pivotal experience that has prepared the author for success in the field of quality assurance.
